

# DELIVERING BETTER.

Queenstown's pristine environment promises visitors adventure and beauty in equal measure, but an exploding population is resulting in mountains of a different type – rubbish piles. Enter waste management company All Waste, which recently purchased a new Fuso Fighter FK1025 to help keep the town beautiful.

Where just one truck could handle the job, now All Waste has two trucks working full-time with another running part-time – up to 80 tonnes of waste being processed at the transfer station on a daily basis.

With a number of Fighter rubbish collection trucks having proven their worth in All Waste's Invercargill fleet, operations manager Chris McGregor didn't hesitate to put a new FK1025 – equipped with a bi-fold gantry bin – to work in Queenstown.

"It's a good size; big enough to carry

three- to five-tonne loads, yet small enough to get where we need to go," says Chris. "The 184kW engine has plenty of power and the Eaton six-speed manual transmission gives our drivers more control driving on ice and snow in winter."

As more and more people flock to Queenstown to enjoy its iconic views, the team at All Waste can rest assured it's well supported by a hardworking Fuso in the fight to keep this fast-growing region looking beautiful.
